Innovation and tradition are the guiding principles of the Hunger Hydraulics Group. Great importance is attached to personal customer service and advice besides Internet and E-commerce.

Quality does not only refer to the product alone. All corporate processes have to be of highest quality nowadays. The Hunger group has taken up this challenge and certified its companies according to ISO 9001-2000.

Over 200 patents and property rights of the company founder are still and steadily supplemented by new patent enrolments.
